

AKSHAT SHAH

Software Engineer | Java Specialist

Chicago, IL (Greater Area) | akshatshah.info | akshatamitshah@gmail.com |

linkedin.com/in/akshatamitshah

PROFESSIONAL SUMMARY

Mid-level Software Engineer with over 4 years of experience specializing in building and maintaining robust enterprise applications, with a focus on Java legacy systems and modernization. Proven track record in the full Software Development Lifecycle (SDLC), from designing RESTful APIs to optimizing high-volume batch processing for critical government healthcare systems. Experienced in production observability, defect remediation, and technical mentorship.

TECHNICAL SKILLS

Languages: Java (Core & Enterprise), SQL (Db2), JavaScript, Python, HTML/CSS

Backend: RESTful API Design, Batch Processing, Spring, Microservices Concepts

Tools: Git, Jira, IntelliJ IDE, Log Analysis Tools, API Management (APIM)

Core Skills: System Analysis, Code Reviews, Legacy System Maintenance, Mentoring

PROFESSIONAL EXPERIENCE

RedMane Technology LLC

June 2021 – Present (Total Tenure)

Senior Software Engineer (M&O)

[e.g., June 2024 – Present]

- Performance Engineering:** Led optimization efforts on high-volume batch workflows, resulting in a **1+ hour reduction** in runtime by re-engineering complex SQL queries.
- Data Integrity:** Implemented patches to eliminate logic flaws causing over **100 million redundant records** to be saved, vastly improving database efficiency and storage costs.
- Observability:** Established monitoring protocols utilizing log analysis and APIM (API Management) platforms to proactively identify and remediate production data anomalies.
- Mentorship:** Actively **mentored junior engineers** in Java best practices and conducted rigorous code reviews.
- Incident Leadership:** Led **Root Cause Analysis (RCA)** for high-severity production incidents, reducing Mean Time to Resolution (MTTR) by creating standardized recovery documentation.

- **Technical Debt Reduction:** Strategically identified and refactored brittle legacy modules, significantly reducing regression risks and maintenance overhead for the team.
- **Capacity Planning:** Collaborated with infrastructure teams to forecast database growth and storage requirements based on utilization trends from the 400+ concurrent user base.

Mid-Level Software Engineer (Deployment & QA)

[e.g., Feb 2023 – May 2024]

- **Product Launch: Spearheaded the successful transition** of the South Dakota Medicaid Eligibility system into the live SIT/UAT environments.
- **Integration Testing:** Developed and executed comprehensive test scripts to validate seamless integration between newly developed Java modules and existing enterprise infrastructure.
- **Defect Resolution:** Prioritized and resolved critical defects identified during end-to-end testing to ensure application readiness for a **400+ concurrent user** environment.
- **Cross-Functional Collaboration:** Served as the **primary technical liaison** between the development team and QA/Business Analysts, translating testing feedback into actionable engineering items.
- **Deployment Process:** Streamlined release management by automating validation checks on deployment artifacts before passing packages to the Production Support team.
- **System Hardening:** Contributed to hardening the application against concurrency errors and edge cases identified in load testing, significantly improving overall system reliability post-deployment.

Junior Developer (Implementation Team)

[e.g., June 2021 – Jan 2023]

- **Feature Development:** Implemented core business logic in **Java** for key Medicaid features according to architectural designs.
- **API Implementation:** Contributed to the development and documentation of internal **RESTful APIs** to facilitate complex data integrations.
- **Code Standards:** **Adhered strictly to established enterprise coding standards** and design patterns, successfully passing peer review on initial feature commits.
- **Troubleshooting: Resolved entry-level bug reports** and fixed low-priority technical debt items by diagnosing issues within the existing codebase.
- **Agile Collaboration:** Actively participated in daily stand-ups and contributed to sprint planning sessions within the ****Agile/Scrum framework****.

EDUCATION

DePaul University

Graduated: 2020

Bachelor of Science in Information Technology
